

POL-W-02 ENVIRONMENTAL POLICY

Winson Group Environmental Policy is based on the principle that an environmentally committed and aware company fully supported by Senior Management, maximises the long term value that Winson Group incorporating Signet and insignia brings to our employees, community, our customers, shareholders and the environment

We will continuously strive to improve the environmental performance of our operations, and consider the long-term cost and benefit by continuous improvement of plant designs, work practices, and the training we give to all employees.

Winson Group's premises, processes, and procedures in as far as known comply with all relevant legislation, and our company-wide pursuit of Best Practice and Continuous Improvement mean, that our decisions in the absence of legislation are guided internally by a thoughtful business practice, are appropriate to the nature, scale and environmental impacts of the Winson Group and its activities

Where required by legislation or where significant environmental hazards have been identified, develop and maintain appropriate emergency response programmes and ensure employees and other person/s to site/s are trained through inductions and other awareness training to recognise environmental concerns

This environmental policy provides the framework for the reviewing of the environmental objectives and targets which is communicated to all persons working for or on behalf of the organisation and is available to the public on request

Jack Winson
Managing Director
Winson Group
